SUMMARY

Senior Product Leader and Business Growth Leader with 25 years of experience creating and scaling B2B and B2B2C SaaS platforms, renowned for fostering innovation and growth. Proven success in launching core products like Excel for Microsoft and FilesAnywhere for Mark Cuban, scaling to millions of users and driving over $10mm+ in ARR growth. Specializes in developing product vision, innovation leadership, and strategic planning, with demonstrated ability to manage complex B2B portfolios, executing comprehensive/connected digital roadmaps. Highly experienced in mentoring teams and enhancing market performance through strategic foresight and customer insights. Proficient in agile methodologies, product tools, and data analytics to drive product success. Adept at complex problem-solving and effective cross-functional leadership in matrix organizations to achieve alignment on priorities, objectives, and operational requirements. Skilled in converting market intel into strategic roadmaps for competitive positioning.

EXPERIENCE

CEO, CTO & Founder, QuantJazz, Dallas, Texas **Jun 2025 — Present**

FinTech Venture

- Founded and developed QuantJazz, a proprietary trading venture focused on engineering and deploying advanced AI and algorithmic strategies for cryptocurrency markets.
- Engineered a portfolio of proprietary trading algorithms by applying quantitative analysis, AI, and deep learning techniques to model and capitalize on cryptocurrency market dynamics.
- Built and deployed a full-stack platform to streamline the entire lifecycle of automated trading systems, including strategy development, rigorous backtesting, and live market execution.
- Directed the end-to-end project lifecycle, from initial concept and system architecture to the continuous research and development of novel AI-based mathematical trading models.

CEO, Head of Product & Founder, FilesAnywhere, Dallas, Texas (1995-2018) **Oct 2024 — Present**

Founded then scaled the world's first and longest-running cloud storage service for business users.

- Visionary Founder: Transformed an IT consulting firm into a successful global SaaS platform, securing $2M from Mark Cuban, and launching the world's first business cloud storage product in alignment with strategic business goals and customer value.
- Innovative Head of Product: Grew FilesAnywhere from 0 to 10,000 paid business customers, 3M+ users, and $10M+ in SaaS sales, increasing revenue 65% in 3 years. Roadmaps focused on Product Vision, strategic foresight, and Product Led Growth.
- Strategic Pivot: Successfully shifted focus from consumer/SMB to Enterprise, driving sustained B2B revenue growth and 20 years of operational continuity with effective lifecycle management and a competitive advantage in brand protection.
- M&A Success: Led a reverse-merger with Mark Cuban's only public company ever in 2010 as Chairman and CEO, culminating in a successful acquisition and post-transaction business transformation.

Product Management Lead, Global Product Operations, Boeing Digital, Plano, Texas **Nov 2022 — Oct 2024**

Spearheaded transformational product management initiatives as thought leader to $2B global product organization.

- AI Innovation: Designed and deployed 'DAS Evolution,' a comprehensive program empowering 4,000 employees to harness AI, ML, VR and cloud modernization, fostering a culture of innovation, customer insight, and team alignment. Created an AI Resource Center and AI training for product teams, focusing on empowerment and continuous improvement.
- Digital Acceleration: Launched 'Digital X,' a centralized online platform equipping 70 product managers and leaders with transformative tools and expertise, expediting product delivery and strategic execution aligned with customer needs and insight.
- Strategic Execution: Led an integrated product team in developing and delivering 'Digital X' workshops, accelerating strategy execution across 120 portfolio offerings and driving business outcomes with a focus on tactical execution and customer value.
- Product Operations Leader: Developed and delivered PDLC framework training to 170 product professionals, creating a Product Manager upskilling program leveraging Qualtrics data-driven feedback to enhance performance and innovation, ensuring documentation and planning were integral to professional services and customer value.

Director of Product Management, Solera Holdings / Vista Equity Partners, Westlake, Texas, United States **Aug 2018 — Apr 2022**

Led 3 product teams to modernize the technology stack and unify offerings to accelerate growth of a SaaS product suite, scaling annual transaction volumes to $1B across 1200 auto dealerships.

- Cloud Transformation: Led modernization of Title Tech automotive software, migrating to multi-tenant SaaS architecture, boosting scalability to $1 B annual transactions, and UX efficiency for 1200 dealerships, supporting customer success and brand protection.
- Portfolio Growth: Drove strategic growth of legacy SaaS B2B workflow portfolio, supporting $30mm in annual revenues through data-driven decision-making and customer-centric innovation, managing multiple workstreams and safeguarding customer interests and brand protection.
- Enterprise API Innovation: Launched 'Solera Enterprise API' and claims workflow automation for Top 10 insurance customers, increasing revenue by 15% YoY through streamlining vehicle insurance claims data and leveraging analytics.

Product Lead, Microsoft Excel, Microsoft Corporation, Redmond, United States

Led a team of 50 engineers, facilitating the development, beta and GTM of a major version Excel. Launched and directed the first Excel technical support services center for Microsoft in Las Colinas, Texas.

- Spearheaded the development of Microsoft Excel as Product Lead, driving collaboration across teams, delivering a world-class beta program with clear roadmap development.
- Built and led a high-performing team of 70+ engineers in the Central Region, aligning timelines with strategic objectives and ensuring system architecture met product vision and customer needs.

Software Developer Consultant, Investcorp Bank, Manama, Bahrain

- Designed and developed a custom in-house enterprise investment management system for Investcorp Bank, empowering the management of $34B in private equity assets.
- Developed and deployed advanced database applications for FAA, Nissan, and Victoria's Secret, driving business efficiency and supporting brand protection.
